

IIT-Madras invites students to access AI English learning platform to improve Communication Skills.

By Education Desk: February 17, 2024

IIT Madras is now providing an online AI-based English learning platform for its students, which will help students improve their communication skills. Through this, students can access more than 500 hours of learning with self-paced guides and multi-media content, which will help them improve their understanding of English grammar through their mother language.

“Communication in English is important for all, be it technical paper writing, quizzes, semester exams, internship interviews, project reports, placement interviews and general interaction with peers. The AI-inspired LANQUILL tool is suitable for all levels of learners. It helps students to express ideas clearly in an academic and professional format. And real-time speech analyser helps improve your accent and pronunciation and also grammar checker to help explore all aspects of your writing, including sentence structure, sentence length, writing style, punctuation, voice, and much more,” IIT Madras said.

For those who are keen on undergoing formal certification, there are 7 level certifications which can be undergone in a self-paced manner:

- Grammar Assessment- Foundation-level Topics
- Vocabulary Assessment- Higher Elementary level
- Listening Skill Assessment
- Reading Skill Assessment
- Speaking Skill Assessment
- Writing Skill Assessment
- Adaptive Assessments
